

SPOTTED GUM

STANDARD TRADE NAME	Spotted Gum
OTHER NAMES	Iron Gum; Eucalyptus maculata
DISTRIBUTION	Australian East Coast, South East Queensland to Northern regions of NSW.
COLOUR	The word "spotted" refers to the soft mottled colour caused by weathering of the outer tree as it sheds elliptical strips of bark. This colour varies from pale grey-browns and soft creams to a rich chocolate brown.
GRAIN	A frequent, wavy grain which can produce an attractive and high valued fiddleback effect.
DENSITY/STRENGTH	Dry Density: 950 kg/m ³ Janka Dry Hardness: 11 kN These properties are only a guide. As timber is a natural product there will be variations within any species. The Janka Dry Hardness rating measures the hardness of the wood. The higher the rating the harder the wood.
DURABILITY & PROPERTIES	Hard, durable and highly resistant to decay. A very tough timber.
USES	Applied and structural Flooring, Decking, Weatherboards
