

JSC Prime Radiata Weatherboard System Features

JSC Prime Radiata Weatherboards provide a superior solution to your external cladding requirements, whether it is a new build, renovation, or alteration.

Our weatherboards are 20mm thick and manufactured from Premium Radiata #1 Clears and have been treated to H3.2 with MicroPro® treatment.

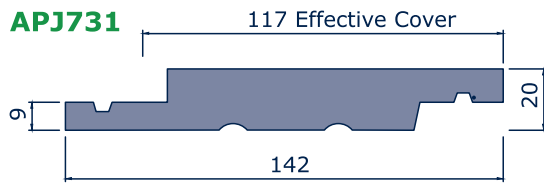

Our products will give you confidence and peace of mind that this quality option will stand the test of time, is sustainable and a system you can trust.

**Please contact JSC
for further information**

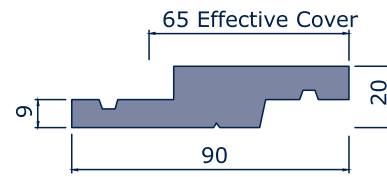

- Made from Premium quality Radiata Clears #1 – Offers a superior finish with no finger joints.
- The timber is FSC® Mix which ensures it is from responsible sources – see www.fsc.org for more information.
- MicroPro® Treatment, a full penetration waterborne treatment which is more environmentally friendly and more compatible with other building materials than the equivalent H3.2 CCA*
- Available in Vertical, Rusticated and Bevel-back profiles on the JSC cavity system
- Thicker 20mm profiles for added stability and increased visual depth
- Available in a range of high quality finishes - dressed or band sawn face; 2-coat prime system or stain finishes**
