

# JSC Cedar Tone Plywood Cladding

High grade cedar-tone hardwood plywood that has a textured, visual grain face, gives your build project a stunning cedar look finish. The band sawn texture face gives a depth of rich colour across the face. The benefits of hardwood cedar tone plywood are the reduction in coating maintenance and the ability to stain in a darker colour range than standard pine plywood.

## Key Features

- Exterior Cladding (suitable for cedar batten finish)
- Interior lining and ceilings
- 12mm thick Okoume (Gaboon) band sawn faced to offer a natural open timber grain appearance with a close resemblance to Western Red Cedar.
- It allows the plywood sheets to take a full range of coatings.
- Untreated – Oregon Heartwood Core
- No Added Urea Formaldehyde (NZUF)
- CARB compliant
- Can also be used for interior applications due to its numerous environmental credentials.
- JSC Cedar Tone Plywood is manufactured in USA. It holds third party certification to “APA-QMS” standards.
- Pass™ Appraisal in New Zealand
- It can be combined with battens on sheet sizes up to 3m.

## Sizes

- 2440 mm x 1219 mm x 12 mm
- 3050 mm x 1219 mm x 12 mm (\*Limited Stock)
